

Unix Lab 1B- Unix/Linux Commands

1. The **echo** command takes a line that you type and repeats it back on the screen. Redirect your input line to a file named **myFile**.
2. Use the **echo** command to input 5 more lines and redirect them to file **myFile**, which will contain a total of 6 lines of text.
3. Using the commands **who**, **who am i**, and **date**, append to file **myFile** the outputs of the above commands.
4. Suppose **myFile** is in your working directory. Specify the command(s) you would use to do the following:
 - a. Give everyone permission to read **myFile**; do not change any other privileges.
 - b. Permit the owner (you) and group members to read and write the file; remove all privileges from everyone else.
 - c. Remove writing privileges from everyone but the owner.
 - d. Give the owner and group members permission to execute **myFile**, while giving the owner sole permission to read and write the file.
5. Suppose you have a directory named **myStuff** in your working directory. Specify the command(s) you would use to do the following:
 - a. Give everyone permission to list files in **myStuff**; do not change any other privileges.
 - b. Permit the owner and group members to list, remove, or add files; remove all privileges from everyone else.
 - c. Remove writing privileges from everyone but the owner.
 - d. Give the owner and group members permission to execute **myStuff**, while giving the owner sole permission to read and write the directory.
6. Create a set of text files and name them *backgammon*, *backpacking*, *baseball*, *boxing*, *biking*, *chess*, *fencing*, *blackjack*, *groupA*, *groupB*, *groupX*, *groupY*.
 - a. How would you use **cat** to show the contents of the files ending in *ing*?
 - b. How would you list any files containing *x* or *X* in the file names?
 - c. How would you show the contents of files with names containing *o*?
 - d. How would you show the contents of the files *backgammon*, *backpacking* and *blackjack* using just one command?
 - e. How would you copy the contents of all 3 files *backgammon*, *backpacking* and *blackjack* to a file named *all3* using just one command?
7. Given the file [phone_book.txt](#), specify the commands you would use to do the following:
 - a. Display entries of people whose names contain pattern *alex*, case-insensitive. (The output should be the entries of *alex johnson* and *Alexander Smith*.)
 - b. Count the number of people whose area code is 905. Display just the count (not the entries).
 - c. Display the entries of the babysitters.
 - d. Count the number of friends whose names are in *phone_book.txt*. Display just the count (not the entries).

Save your commands in a file named **commands.sh** containing the following header and DEMO file **commands.sh**.

```
# Filename: commands.sh
# Author: Last name, first name
# Email: Preferred email address
# Login ID: EECS login ID
```

Deliverable

1. Demo to your lab TA

Rubrics: Lab1_B is for 5 marks. Students should be able to demo all tasks from 3 to 7 given above for maximum marks. Please note tasks 1 and 2 are optional.

Please note that you need to create your own files and directories to be used in the tasks above. Only *phone_book.txt* has been provided on eClass.
